3. You will be directed to the Online Learning Center home page. To access CARSEP, click on the CARSEP icon.

The screenshot shows the ASCRS Online Learning Center home page. On the left, there is a search bar and a navigation menu. The navigation menu includes 'Home', 'Site pages', 'My profile', 'My courses', and 'Transcript'. The main content area features a banner for the Online Learning Center, followed by a description of CREST and CARSEP. The CARSEP logo is circled in yellow with a '3' next to it. Below the CARSEP logo, there is a 'Courses' dropdown menu. On the right side, there is a calendar for February 2018.

4. To start in a Pillar, click on the desired pillar from the “Current Courses” dropdown menu located in the blue navigation box on the left-hand side.

5. In the middle of the page, click on the box with the check mark next to the Pillar name.
Colon and Rectal Surgery Educational Program (CARSEP® IX)

The screenshot shows the 'Current Courses' dropdown menu for CARSEP IX. The 'Miscellaneous' option is circled in yellow with a '4' next to it. Below the dropdown, the 'Miscellaneous Pillar' is selected, indicated by a checkmark and circled in yellow with a '5' next to it. The 'Miscellaneous Pillar' description is visible below the selection.

6. You will be directed to a new page. Click on the blue button that says “Attempt Quiz Now” in the center. This will take you to the quiz.

Question 1
Correct
Mark 1.00 out of 1.00

Flag question

A 67-year-old man with stage III colon cancer is undergoing the placement of a right subclavian port in order to adjuvant therapy. He is receiving monitored anesthesia with intravenous sedation. Because he has an allergy to Betadine, an alcohol-based antiseptic is used for skin preparation. While creating the skin incision with electrocautery, a cutaneous fire occurs.

Which of the following is the most likely causative factor?

Select one:

- A. Supplemental oxygen ✓
- B. Alcohol-based skin preparation
- C. Performing an upper body procedure
- D. Use of paper drapes

Check

Correct Answer:
The correct answer is: Supplemental oxygen

Explanation:
Surgical fires are a rare but potentially devastating complication of surgery and a significant source of malpractice claims. Operating room fires require the combination of a fuel source (such as alcohol in the preparation solution of cloth or paper drapes, and other potential sources), an oxidizing agent (such as supplemental oxygen or even air), and an ignition source (such as cautery or laser). Electrocautery is the ignition source in almost 95% of cases. Supplemental oxygen was the oxidizing agent in 95% of cases where a malpractice claim was filed. Monitored anesthesia with oxygen administered via an open system can ignite fires even at low oxygen concentrations. Conversely, alcohol or volatile skin preparations were involved in only 15% of cases that occurred during monitored anesthesia. Operating room fires tend to occur more frequently during procedures involving the upper airway or head and neck, but they can happen with procedures involving any part of the body. Endotracheal intubation and the

10. **To access the next question use the “Quiz Navigation” box on the left-hand side or click on the ‘Next’ button on at the bottom of the questions feedback.**

11. Navigate to the next question and track your progress using the Quiz Navigation box on the left-hand side.
 - a. The question number you are working on will be identified by a circle around the number.
 - b. The questions you have answered incorrectly will be identified by a red box.
 - c. The questions you have answered correctly will be identified by a green box.
12. Once you've completed all the questions within the pillar, you must click on "Finish attempt..." in the Quiz Navigation box.

The screenshot shows a quiz interface. On the left, a blue 'Quiz navigation' box contains a grid of question numbers from 1 to 24. Question 1 is circled in white, and the 'Finish attempt...' button is circled in orange. An orange arrow points to question 1, and another orange circle highlights the 'Finish attempt...' button. To the right, a question card for 'Question 1' is displayed, which is 'Not complete' and 'Marked out of 1.00'. The question text reads: 'A 35-year-old woman with chronic back pain is being treated only with the use of laxatives. Colonoscopy is normal. Which of the following is the most appropriate next step?' The options are: A. High-fiber diet and laxative regimen, B. Biofeedback therapy, C. Sigmoid resection and rectopexy, and D. Total colectomy with ileorectal anastomosis. A 'Check' button is at the bottom of the question card.

13. Once you click on "Finish attempt...", you will be shown a summary of your quiz results.

Colon and Rectal Surgery Educational Program (CARSEP® IX)

The screenshot shows the 'Quiz navigation' box with a grid of question numbers from 1 to 24. The 'Finish attempt...' button is visible at the bottom of the box. Below the box, there is a search bar with the text 'To search for courses, please use the search box below.' and a 'Search courses:' label.
